

Viewguard Motion detectors PIR and DUAL detectors

Passive infrared sensor

Passive infrared and microwave sensor

Variations PIR detectors:

- **Viewguard PIR AM BUS-2/BUS-1**
VdS Class C
EN 50131-1 and EN 50131-2-2, grade 3
SES-EMA-RL-T2:2010-08
- **Viewguard PIR BUS-2/BUS-1**
VdS Class B
EN 50131-1 and EN 50131-2-2, grade 2
SES-EMA-RL-T2:2010-08
- **Viewguard PIR AM FAI**
VdS Class C
EN 50131-1 and EN 50131-2-2, grade 3
SES-EMA-RL-T2:2010-08
- **Viewguard PIR FAI**
VdS Class B
EN 50131-1 and EN 50131-2-2, grade 2
SES-EMA-RL-T2:2010-08

Variations DUAL detectors:

- **Viewguard DUAL AM BUS-2/BUS-1**
VdS Class C
EN 50131-1 and EN 50131-2-4, grade 3
SES-EMA-RL-T2:2010-08
- **Viewguard DUAL BUS-2/BUS-1**
VdS Class B
EN 50131-1 and EN 50131-2-4, grade 2
SES-EMA-RL-T2:2010-08
- **Viewguard DUAL AM FAI**
VdS Class C
EN 50131-1 and EN 50131-2-4, grade 3
SES-EMA-RL-T2:2010-08
- **Viewguard DUAL FAI**
VdS Class B
EN 50131-1 and EN 50131-2-4, grade 2
SES-EMA-RL-T2:2010-08

VdS approval no. see page 7.

The detectors are suitable for intrusion alarm panels with BUS-2/BUS-1- or conventional connection technology and are available with or without **Anti-Mask** function (monitoring against covering).

To ensure optimum detection, detectors are equipped with high-quality mirror optics. Standard equipment includes a mirror for area optics.

The **Viewguard PIR detectors** are motion detectors based on the passive infrared principle.

If required, the detectors can be retrofitted on site to long-range optics or curtain optics with accessories that are available separately.

The Viewguard DUAL motion detectors comprise two sensor systems that operate independently:

- **Passive infrared sensor and microwave sensor.**

The functioning principle of the detector is based on an intelligent linking of the two sensor systems. This type of linking renders the detectors particularly insensitive to air and thermal turbulences. Their distinguishing features being optimum alarm detection and extremely high false alarm security.

Features

Anti-Mask function (only AM detectors)

- Detects covering, spraying or taping of the foil.

LED indication

- Clearly arranged indication of operating state via two LEDs. Walktest indication.

FAI-logic (First alarm indication, all types)

- The detector that is triggered first, can be identified with the aid of the LED indication.

Walk test function

- Easy way to check function and detection area.

Detector zone input (only BUS detectors)

- Integration of contacts/potential-free detectors in the BUS-2/ BUS-1 system (zone not erasable).

Microwave sensor (only DUAL detectors)

- Can be deactivated in the "disarmed" state.

Fault/cover signal: only don't save	—	—	X	—	—	X	—	—	X	—	—	—
Cover contact/tear-off protection	X	X	—	X	—	—	X	X	—	X	—	—

EL EasyLogic mode. Only operating voltage and alarm output used (not as per VdS)

1) Viewguard mode on BUS-2 is supported from panel software V07 (HB/MB24, HB/MB48, MB 100).

2) Operation on BUS-1: The detector group is connected in an "OR" function with the alarm message

3) The "Alarm" and "Fault" outputs can be connected in series.

Detection range

- Range programmable in four stages.

Detection sensitivity

- Sensitivity programmable in two stages.

Save fault / do not save fault

- Save: Fault is saved until it is cleared.
- Do not save: Fault signal is reset automatically after eliminating the fault.

Self-test (only AM detectors)

- Correct functioning of the detector is monitored in cycles.

Monitoring of operating voltage

- Fault message if the operating voltage drops to low.

Temperature measurement (only BUS-2 application)

- Temperature alarm if ambient temperature is too high/too low. Programmable alarm thresholds.

Tear-off protection/Cover contact

2) Operation on BUS-1: The detector group is connected in an "OR" function with the alarm message

3) The "Alarm" and "Fault" outputs can be connected in series.

Detection coverage Area optics

Optics

Area optics with sneak-by guard (state of delivery)

Lens splitting	22 zones at 5 levels
Opening angle	80° hor., 64° vert.
Range	8 / 11 / 13 / 15 m (PIR and MW operate automatically with the same range)

Mounting height

Recommended: 2.5 m for optimal operating sensitivity.

Permitted: 2.2 m to 3.4 m PIR detectors
2.2 m to 4.0 m DUAL detectors

ATTENTION! Important note for mounting heights of more than 3.00 m:

In case of mounting heights of 3.00 to 3.40 m, the close range between 0 - 1.50 m cannot be monitored completely despite the requirements for VdS systems of class C (see detection coverage diagram on right side).

As the case may be, the respective areas must be monitored separately by appropriate means (such as a second detector).

Detection diagrams

The following diagrams refer to a range setting of 15 m.

Note: The detectors have a high immunity against false alarms without reference surface

1. Mounting height 2.5 m (2.20 to 3.00 m)

Horizontal detection coverage

Due to the additional microwave, the dual detector has a very high detection capacity even with diagonal movement.

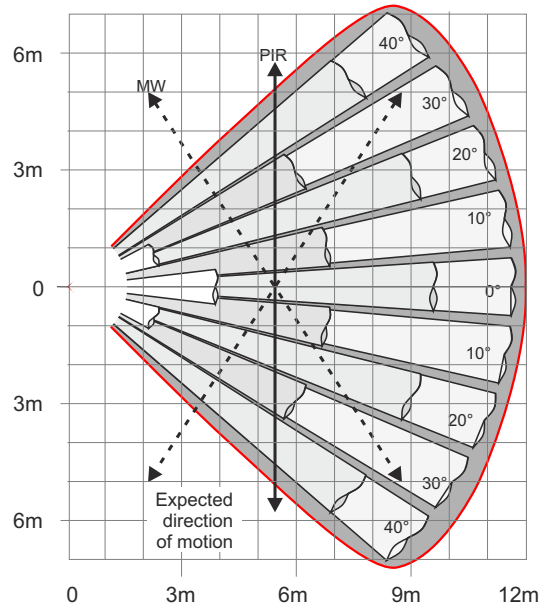

Vertical detection coverage

Vertical inclination 0°

2. Mounting height 3.20 (3.00 m to 3.40 m)

Horizontal detection coverage

Vertical detection coverage

Vertical inclination 3° downward

3. Mounting height 3.70 (3.40 m to 4.00 m) (only DUAL detectors)

Horizontal detection coverage

Vertical detection coverage, vertical inclination 7° downward

Detection coverage Viewguard PIR Replacement Mirror sets

The Viewguard PIR Replacement Mirror sets are not suitable for DUAL detectors.

- VdS** approval in combination with all VdS approved Viewguard PIR detectors (approval no. see page 7).
- Viewguard PIR Class B
 - Viewguard PIR AM Class C

• Curtain optics

033434 Viewguard PIR mirror, Curtain optics (PU = 3 piece)

The curtain mirror is suitable for monitoring possible intrusion locations.

- mirror distribution 11 zones on 11 levels
- acceptance angle 7.5° hor., 85° vert.
- range 17 / 21 / 25 / 30 m

Mounting height:

- Recommended: 2.50 m
- Permitted: 2.20 m to 3.00 m

Horizontal detection coverage

Vertical detection coverage. Mounting height 2.50 m

• Long-range optics

033435 Viewguard PIR mirror, Long-range optics (PU = 3 piece)

The long-range mirror is suitable for monitoring corridors.

- mirror distribution 8 zones on 6 levels
- acceptance angle 30° hor., 78° vert.
- range 29 / 35 / 42 / 50 m

Mounting height:

- Recommended: 2.50 m
- Permitted: 2.20 m to 3.00 m

Horizontal detection coverage

Vertical detection coverage. Mounting height 2.50 m.

Retrofitting of the mirror optics

Easy retrofitting of the mirror optics on site:

1. Remove screw
2. Fold up mirror
3. Remove mirror

Installation:

Insert the new mirror in reverse order. Insert the screw and tighten slightly. Close housing.

Mounting

1. Mounting directly on the wall

Mounting possibilities:

- 0° Vertical at a 0° downward angle ①
- 3° Vertical at a 3° downward angle ②
- 45° Horizontal at a 45° angle to the left or right ③
- Corner mounting ④

Please note:

When installed in accordance with VdS systems class B and C, the **backtamper must be used**.

Backtampre is not possible when installing as per Fig. ③ a) and ③ c) (PIR detectors) or Fig. ③ c) (DUAL detectors)

The only exceptions are class B detectors without backtamper.

2. Mounting on Adjustable joint (Accessories, Item no. 033390.17)

Should the mounting possibilities in accordance with Fig. above not suffice, the detector can be mounted on the "Adjustable joint".

Swivel range: $\pm 20^\circ$ horizontal, $+4^\circ$ to -8° vertical.

Detector on Adjustable joint as per **EN grade 2**.

Mounting possibilities:

- Mounting directly on the wall ⑤
- 45° Horizontal at a 45° angle to the left or right ⑥
- Corner mounting ⑦

The adjustable joint is not provided with a backtamper!

For the installation in VdS systems of class B and C, a solid basis with the defined inclination is required on site to ensure proper functioning of the backtamper.

The only exceptions are class B detectors without backtamper.

3. Mounting on Ball-and-socket set (Accessories, Item no. 033588.17)

The Ball-and-socket set provides the most versatile adjustment possibilities.

Swivel range: $\pm 45^\circ$ horizontal, $\pm 20^\circ$ vertical.

Mounting on Ball-and-socket set not as per VdS and EN.

Technical Data

Operating voltage U_b	12 V DC
Operating voltage range	8.0 V to 15 V DC
Current consumption at U_b=12 V DC:	
PIR	PIR detector: 1.6 mA (BUS-2 and FAI), 3.0 mA (BUS-1) DUAL detector: 6.6 mA (BUS-2 and FAI), 9.0 mA (BUS-1)
LED	4 mA
Detection range (programmable):	
Area optics	8 / 11 / 13 / 15 m
Long-range optics (Item no. 033435)	29 / 35 / 42 / 50 m
Curtain optics (Item no. 033434)	17 / 21 / 25 / 30 m
Detection sensitivity (programmable):	normal / high
PIR sensor	temperature compensated
Anti-Mask function (only AM detectors)	up to 30 cm
Frequency microwave (only DUAL detectors)	9.35 GHz (X band)
Contacts: (only FAI detectors)	
Alarm- and fault contact	15 V DC / 0.1 A, Internal resistance $\leq 25 \Omega$
Tamper contact	15 V DC / 0.1 A, Internal resistance $\leq 10 \Omega$
Protection category as per EN 60529	IP 30
Environmental class as per VdS	II
Operating temperature range	-10 °C to +55 °C
Storage temperature range	-25 °C to +70 °C
Dimensions W x H x D	PIR detector: 64 x 130 x 48 mm DUAL detector: 64 x 158 x 48 mm
Colour	traffic white (similar to RAL 9016)
